

1.20 Pre-Test: Trigonometry skills

1. Express each value as a decimal, first writing the whole calculator display, and then the 3 sig-fig approximation. [4 marks]

(a) $\frac{2\pi}{3}$

(b) $\frac{\sqrt{3}}{2}$

2. Express each value as a decimal, rounding to 3 sig-figs if necessary. [3 marks]

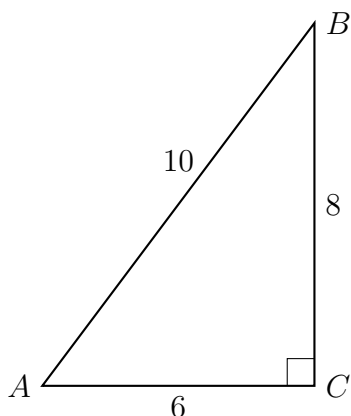

(a) 4.561×10^4

(b) 1.90×10^{-3}

3. Find the volume of a spherical balloon 36 meters in diameter. [3 marks]

4. A cone has a height of 24 cm and volume of $220.5\pi \text{ cm}^3$. Find its radius. [3 marks]

5. $\triangle ABC$ is shown with $m\angle C = 90^\circ$ and the lengths of the triangle's sides are $BC = 8$, $AC = 6$, and $AB = 10$.

- (a) Write down the value of $\sin A$. [1 mark]

- (b) Find the measure of $\angle A$. [2 marks]

6. In right triangle ABC , hypotenuse \overline{AB} has a length of 26 cm, and side \overline{BC} has a length of 17.6 cm. What is the measure of angle B ?

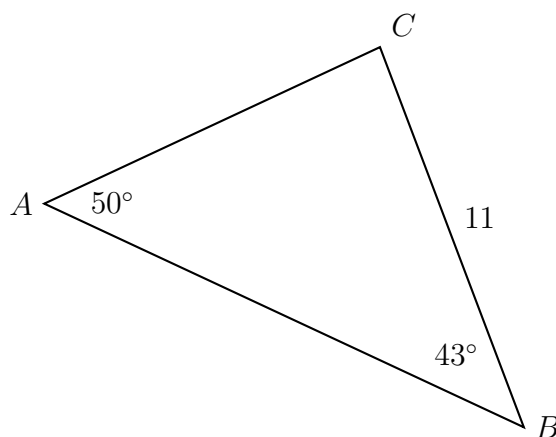

7. Find the slant height of a pyramid with square base 4 meters on a side and height of 4 m. [3 marks]

8. Triangle ABC has an area of 25, with $AB = 7$ and $AC = 8$.

- (a) Find the two possible measures for \hat{A} . [4 marks]

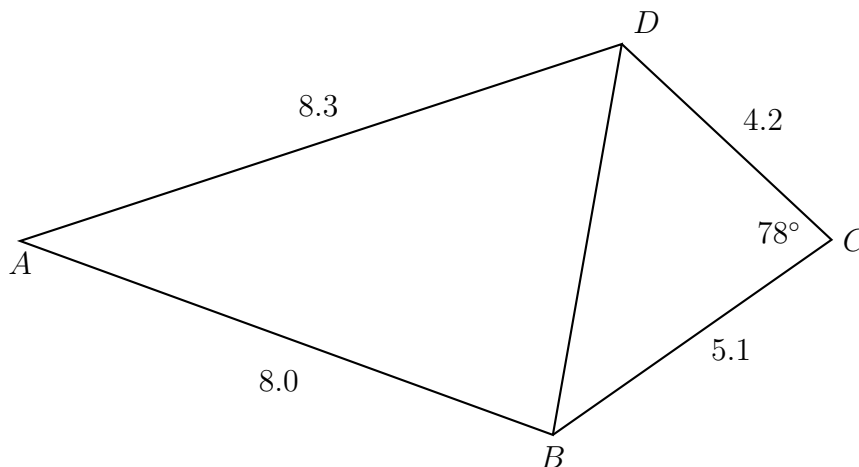

- (b) Given that \hat{A} is obtuse, find BC . [3 marks]

9. The following diagram shows triangle ABC (not drawn to scale).

$BC = 11$, $\hat{CAB} = 50^\circ$, and $\hat{ABC} = 43^\circ$

- (a) Find AC . [3 marks]
(b) Find the area of triangle ABC . [3 marks]
10. The following diagram shows quadrilateral $ABCD$ (not drawn to scale).

$AB = 8.0$, $BC = 5.1$, $CD = 4.2$, $AD = 8.3$, and $\hat{BCD} = 78^\circ$

- (a) Find BD . [3 marks]
(b) Find \hat{ABD} . [3 marks]

Name:

11. BMI is a measure of a healthy personal weight,

$$BMI = \frac{w}{h^2}$$

where

w is a person's weight in kilograms, and

h is height in meters

- (a) Given a height of 160 cm and weight of 54 kg, find the BMI [3 marks]
- (b) These measurements are not exact. Assuming the height is between 159-161 cm and weight 53-55 kg, find the bounds of the BMI. [4 marks]
