Graphing functions and their derivatives

TI-84

Graphing functions and their derivatives

GeoGebra and Desmos

GQ: How do we use a calculator for calculus?

- ▶ CCSS: MP 4 Use technology appropriately
- ▶ Do Now: Graph $f(x) = \frac{1}{4}x^3 - 3x$ (on your calculator). What is the derivative at $x = 4$?
- ▶ Lesson: TI-84 derivative function (p. 208)
- ▶ Homework:

Graphing functions and their derivatives

The TI-84 will calculate the derivative of a function at a point.

MATH \rightarrow 8:nDeriv(\rightarrow

$$\frac{d}{d\square}(\square)|_{\square=\square}$$

$$\frac{d}{dX}\left(\frac{1}{4}X^3 - 3X\right)|_{X=4}$$

Graphing functions and their derivatives

GeoGebra and Desmos will differentiate a function and graph it.
(type "f prime of x")

Graphing functions and their derivatives

If we plot $(4, f'(4)) = (4, 9)$ on which curve will it be, the red or green?
