## Name:

## $\begin{array}{c} {\rm Do~Now~Quiz} \\ {\bf Graphing~exponential~functions} \end{array}$

1. Graph  $g(x) = 15(1.15)^{2x} + 25$  on the set of axes below.

- 2. Is the function an example of exponential growth or exponential decay?
  - (a) Support your answer with evidence from the graph.
  - (b) Give an algebraic argument to explain your answer.
