Name:

2020-21 IB Math: Applications and Interpretation one year course - Class of 2022 (juniors)

Textbook: Oxford IB Mathematics Standard Level, Wathall et al.

(paperback, online supplement)

Calculator: Casio fx-9750GII

Dates	Chapter	Topics	Project	Days
10/1 - 10/9	1. Precision, trig review	Sig Figs, right angle trig. Algebra review:	Desmos plotting	7
		factoring, exponents, graphing		
10/13 - 10/30	2. Trig rules, 3D geometry	Sine, cosine rules, triangle area; volume, sur-	Geogebra 3D graphing	14
		face area		
11/2 - 11/13	3. Descriptive statistics	Frequency, central tendency, dispersion	Subway comparison	8
11/16 - 11/25	4. Coordinate geometry	Gradient, distance and midpoint formulas,	Ballistics application	8
		Voronoi		
11/30 - 12/4	5. Linear functions	Functions, arithmetic sequences	Modeling	5
12/7 - 12/18	6. Bivariate analysis	Scatter plots, correlation, regression	IA Project	10
1/4 - 1/22	7. Probability, distributions	Diagrams and tables, binomial and normal	Simulation (bino-	14
		distributions (Venn diagrams, trees)	mial?), Monte Hall	
1/25 - 2/5	8. Statistical tests	Spearman's rank correlation, chi-squared	(plus 1 week: IA and	10
		and t tests	review)	
2/22 - 3/5	9. Polynomial functions	Quadratics, cubics, inverse function; graphs	Graphical function	10
			analysis	
3/8 - 3/19	10. Exponential, log functions	Geometric sequences, compound interest,	Graphical solutions	10
		logarithms		
3/22 - 4/1	11. Periodic functions	Modeling, unit circle, graphing	(Easter break)	8
4/7 - 4/16	12. Differential calculus	Limits, tangent and normals, max and min	Optimization	6
4/19 - 4/30	13. Integral calculus	Fundamental theorem of calculus		10

Class of 2020 - IB Math - 1st year 2018-19

Dates	Unit	Topics	Project	Days	IB Rec.
9/5 - 9/21	1. Algebra review (Chap-	Notation, domain, range, factoring, expo-	Desmos plotting	8	
	ter 1, 2, 4)	nents; graphing			
9/24 - 10/19	2. Functions (Chapter 1)	Inverse, composition, transformations	Inverse graphing	12	10
10/22 - 11/2	3. Quadratics (Chapter 2)	Completing square, graphs, roots, quadratic formula, discriminant	Ballistics application	8	5
11/5 - 11/21	3b. Rational functions	Solving, graphs, asymptotes	Reciprocal function	9	
	(Chapt 5)	0, 0 1 , v 1	graphing, asymptotes		
11/26 - 12/7	4. Exponents and logs	Solving, graphing, applications, logarithms	Desmos graph manual	7	10
	(Chapter 4)		fit		
12/10 - 12/18	4b. Exponential functions	Solving, graphing, applications		6	10
1/2 - 1/18	5. Polynomials (Chapter	Zeros, symmetry, end behavior, graphing,	Algebra 2 Mock Re-	10	
	6)	imaginary numbers	gents		
1/29 - 3/14	6. Probability (Chapter 3)	Definitions, counting, conditionals, fre-	Simulation (bino-	9	10
		quency, Venn diagrams, trees	mial?), table, trees		
3/18 - 3/28	7. Sequences (Chapter 6)	Arithmetic, geometric, recursive	Infinite geometric se-	8	5
			ries		
4/1 - 4/18	8. Descriptive statistics	Frequency, central tendency, dispersion	Subway comparison	8	5 (+10)
	(Chapter 8)				
4/29 - 5/9	9. Bivariate analysis	Scatter plots, correlation, regression		8	8
	(Chapter 10)				
5/13 - 5/23	10. Trig	periodic functions (Chapter 11, 13)	Trig ratios, unit circle,	7	8 (+8)
			graphing		

(104) total instructional days (including projects and assessments)

Class of 2020 - IB Math - 2nd year 2019-20

Dates	Unit	Topics	Project	Days	IB Rec.
9/5 - 9/21	1. Functions review (Chapter 1)	Graphical features, in/decreasing, extrema		10	
		(gradient), continuity; applications; sequences			
9/24 - 10/5	2. Derivatives (Chapter 7)	Limits, tangents/normals, differentiating poly-		10	10
		nomials			
10/9 - 10/19	3. Vectors (Chapter 12)	Introduction, arithmetic, line equations, inter-		9	8
		section, applications			
10/22 - 11/2	4. Calculus (Chapter 7)	Graphical interpretations, kinematics, applica-		10	10
		tions			
11/5 - 11/21	5. Trig & periodic functions	Sine, cosine rules, transformations, applica-		11	8
	(Chapter 11, 13)	tions, identities, derivatives			
11/26 - 12/7	6. Probability distributions	Binomial expansion, expected value, normal		10	
	(Chapter 15)	distribution			
12/10 - 12/18	7. Bivariate analysis (Chapter	Review cumulative frequency; scatter plots, re-		7	
	10)	gression			
1/2 - 1/18	8. Integration (Chapter 9)	Antiderivatives, areas, motion applications		13	15
1/29 - 2/15	9. Calculus (Chapter 7)	Product/quotient/chain rules, kinematics,		13	5
		graphical interpretation, applications			
2/25 - 3/8	10. Vectors (Chapter 12)	Dot product, angles, applications		10	8
3/11 - 3/22	11. Integration (Chapter 9)	Definite integrals, areas, volumes, kinematics		10	
3/25 - 4/5	12. Functions review (Chapter 1-	Exponentials, logarithms, rational expressions,		10	
	4)	sequences & series			
4/8 - 4/18	13. Probability & statistics re-	Independence, conditional, frequency, cumula-		9	
	view (Chapter 11, 13)	tive, & normal distributions			
4/29 - 5/3	14. Review			5	

137 instructional days (30 more than projected actual)

IB Guide for Math SL

Topic	Skills	Hours
Algebra	Sequences, exponent & log rules, binomial expansion	9
Functions and equations	Inverse, composition, graphing (max, min), transformations;	24
	quadratic, exponential, rational; applications	
Circular functions and trigonom-	Radians, standard angles, identities, graphing; sine, cosine, area	16
etry	rules	
Vectors	Operations, scalar product, angle calculation, line equations, inter-	16
	sections	
Statistics and probability	Concepts, frequencies, cumulative, box plots, summary statistics,	35
	regression; probability, independence, conditional, sets, Venn dia-	
	grams, binomial & normal distributions	
Calculus	Limits, derivative, tangents, product, quotient, chain rules, ex-	40
	trema, inflection, graphs, applications; integrals, areas, volumes,	
	kinematics	
Exploration		10
Total		150

Considerations and strategy

- Weak prior knowledge: reteach early followed by periodic mixed practice
- Shallow understanding, procedural: connect multiple representations, formal notation with explicit rationale
- Little writing or technology experience: projects, Desmos & MS Office instruction
