9-3DN-Composition

- 1. A transformation is applied to a triangle, $\triangle CAT \rightarrow \triangle C'A'T'$. Circle True or False to identify each transformation correctly represented below.
- T F Translated six to the left, down zero
- T F Reflected across the y-axis
- T F $(x,y) \to (x-6, y+0)$
- T F Rotated 90° counterclockwise around the origin

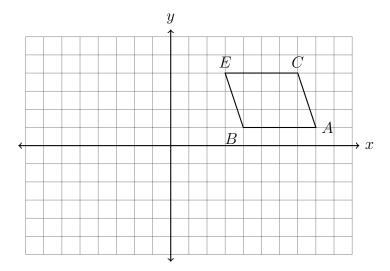

2. Determine and state the transformation mapping $\triangle ABC$ onto $\triangle DEF$. Also, make a mapping table of the coordinate pairs.

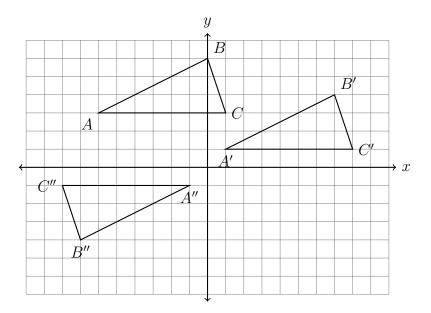

3. First reflect the trapezoid BECA across the x-axis, then move it left five and up two. Label the images B'E'C'A' and B''E''C''A''.

BECA / Dr. Huson / Geometry 09-Congruence-transformat $\aleph nsme:$ pset ID: 151

4. Two translations have been applied to a triangle in the diagram below, $\triangle ABC \rightarrow \triangle A'B'C' \rightarrow \triangle A''B''C''$. Fully characterize each translation.

5. The quadrilateral ROCK undergoes two transformations, shown below. Describe the sequence of transformations applied.
