1

1. A transformation is applied to a triangle,  $\triangle CAT \rightarrow \triangle C'A'T'$ . Circle True or False to identify each transformation correctly represented below.

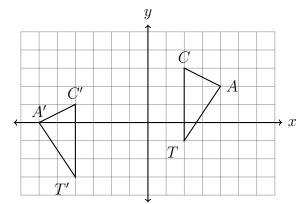

Τ F Translated six to the left, down two

Τ F Reflected across the y-axis

 $(x,y) \to (x-6,y-2)$ Τ  $\mathbf{F}$ 

Τ Reflected across the y-axis, then left F 2, down 2

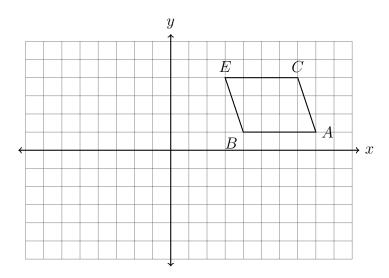

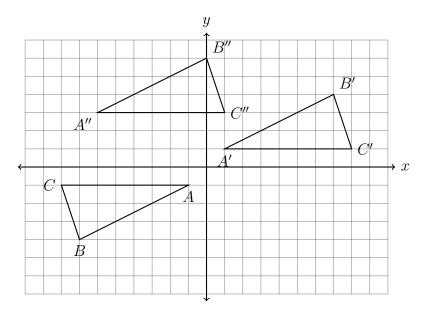

2. Determine and state the transformation mapping  $\triangle DEF$  onto  $\triangle ABC$ . Also, make a mapping table of the coordinate pairs.

3. First reflect the trapezoid BECA across the y-axis, then move it down five and right two. Label the images B'E'C'A' and B''E''C''A''.

4. Two transformations have been applied to a triangle in the diagram below,  $\triangle ABC \rightarrow \triangle A'B'C' \rightarrow \triangle A''B''C''$ . Fully characterize each transformation.

5. The quadrilateral ROCK undergoes two transformations, shown below. Describe the sequence of transformations applied.
